JAMES FISCHER

IT Operations | Systems Administration | Software Engineering

Computer Science senior at the University of Washington with hands-on experience in IT operations, Linux administration, VMware ESXi, DNS management, Google Workspace, and infrastructure troubleshooting. Experienced in supporting large virtual machine environments, automating repetitive administrative tasks, and resolving systems, networking, and web infrastructure issues. Combines technical problem-solving with strong customer-facing and business experience.

EMPLOYMENT HISTORY

IT OPERATIONS MANAGER **Jun 2026 – Present**
Seattle Digital Marketing ***Bellevue, Washington***

- Administer and troubleshoot dozens of remotely accessed Linux/CentOS virtual machines running on VMware ESXi and vSphere, using SSH and command-line tools to manage VM registration, configuration, maintenance, software deployment, and startup, filesystem, networking, browser, and application issues.
- Develop Bash scripts and repeatable command-line procedures to automate software updates, configuration changes, audits, and other repetitive administration across multiple systems.
- Manage DNS, domain, and web infrastructure across a large company-owned portfolio using eNom, Cloudflare, and CloudPanel, including an automated 25-domain TXT-record deployment project that preserved existing production DNS configurations.
- Audit hosted website source files and submission workflows to identify embedded forms, scripts, and endpoints, and reconfigure lead-routing systems to deliver customer inquiries to designated business accounts.
- Administer and troubleshoot Google Workspace, Gmail configurations, business email routing, account access, account recovery, and related technical account-management processes.
- Diagnose and support broader infrastructure including Synology NAS storage, web services, CRM systems, filesystems, and other business technology environments.

SOFTWARE ENGINEER INTERN **Jan 2024 – Mar 2025**
Seattle Software Developers ***Bellevue, Washington***

- Developed a modular feature framework that streamlined implementation of new functionality and reduced development time for future updates.
- Optimized application code and conducted code reviews to identify performance bottlenecks, implementation issues, and opportunities to improve application efficiency and responsiveness.
- Collaborated in Agile development sprints with cross-functional team members, incorporating user feedback into feature refinements and product improvements.

SALES SUPERVISOR **Jul 2025 – Jun 2026**
Casper ***Bellevue, Washington***

- Led day-to-day sales operations and coached team members to achieve sales goals while maintaining a high standard of customer service.
- Analyzed sales performance and customer trends to identify opportunities for improved merchandising, efficiency, and store performance.
- Managed social media content and supported store events while training employees on customer engagement and sales best practices.

SALES ADVISOR **Mar 2025 – Jul 2025**
Best Buy ***Bellevue, Washington***

- Advised customers on computers, electronics, software, and technology services based on individual needs and use cases.
- Used customer feedback, product knowledge, and sales data to recommend solutions and related services, including Geek Squad protection plans.

EDUCATION
